Tables, charts and infographics: Selecting colours

Selecting additional colours

Selecting additional colours for your tables and charts is done using this colour wheel and following these simple steps. This ensures colours will be complimentary and not jar against each other.

1. Find your document's chosen colour pair on the wheel. This is your starting point.
2. Additional colours can be found by moving around the colour wheel either clockwise or anticlockwise.
3. A harmonious result can be achieved by arranging your colours in the order they appear on the colour wheel.

For example:
